

# New U Virtual Makeovers

Using our Virtual Imaging station, this clever device can be used as an attraction for a variety of events, such as exhibitions, health and beauty days or just for laughs in a party setting. Here our consultants will provide guests, using our virtual makeover tools, with the opportunity to try out a different hair style or colour, experiment with contact lenses, make up colours to create a whole new look.

The process taking only a few minutes gives your guests the opportunity to be adventurous and experimental with their image, building confidence and self-esteem.

This attraction is excellent for your guests and employees moral or simply just to have a lighter or different look at their New U Image.
