

FAQs Computer Generated Virtual Makeovers

How it works

Our consultant will take a "Before" photo of a guest and then either through consultation or surprise present an altered "New U" image on screen which is then printed and presented in a folder an "after" shot.

Variety

We can change hair colour design length
Eye colour
Experiment with makeup colours foundations
In any combinations

How long does it take

From the first shot to the last all presented this takes around 5 minutes
We can work from multiple stations to cater to whatever size event

Where can it be used best

This can be used in an entertainment style fashion
Team building days for individual morale
Health and beauty or pamper days

How is it set up

We require access to electric points and space is variable according to how many stations are hired
we require space also for the before shots and a table(s) to set up the consultation desks and two chairs per consultation desk.
